

SULZER

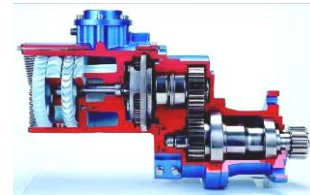

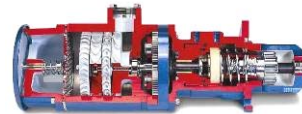

Sulzer Turbo Services New Orleans Inc

Starters for Reciprocating Engines and Gas Turbines

Since the early 1980's, Sulzer Turbo Services New Orleans Inc has been providing users of reciprocating engines and gas turbines in the oil & gas, petrochemical, refining, pipeline and power industries with state-of-the-art parts, shop repairs, and field services for starter systems.

As one of TDI's longest and most established representative, we combine the experience and expertise of manufacturer approved, highly trained service personnel with top quality equipment and components. Our "value added" services include fully warranted repair and remanufacturing of starters and tailor-made retrofit solutions (including ring-gear conversions), all supported by comprehensive inventory held under humidity controlled conditions in our five strategically located facilities. We use only genuine TDI parts.

Sulzer Turbo Services offers off-the-shelf new and exchange units and parts for 24x7 response

SULZER

Sulzer Turbo Services New Orleans Inc

Field Service, Parts & Ancillary Systems for Rotating and Reciprocating Machinery

Established in New Orleans in 1981, Sulzer Turbo Services New Orleans Inc provides users of rotating and reciprocating machinery with experienced **Mechanical Field Service** teams with an outstanding safety record and on a 24x7 basis. On-site inspections, overhauls and repairs are performed on gas and steam turbines, axial and centrif. compressors, hot gas expanders, reciprocating engines/compressors, gearboxes, screw compressors, industrial blowers and pumps. We also manage pre- and post-turnaround work, provide long-term on-site maintenance teams, and inspect / rebuild machinery in our five strategically located workshops.

Ignition & Control Systems for reciprocating engines: distributor for full range of *Altronic* equipment, *Altronic Control* safety shutdown, engine control & automation panels, *Johnson Matthey* catalytic converters, etc.

Governors for recip. engines & steam turbines (hydraulic & electronic): *Woodward*.

Engine Starters for recip. engines and gas turbines plus pre/post-lube pump drives for turbines: *TDI*

Lube Systems for reciprocating machinery, cranes and industrial equipment. Distributor for *Lincoln & CCT/Proflo*.

Our experts also give **tailor-made training courses** on site or in our facilities using test/demo. equipment.

On-Site Major Overhaul of a Gas Turbine

We also supply industry-leading **Ancillary Parts** (new and exchange) for reciprocating and rotating machinery. Tailor-made systems are designed and packaged in-house by our highly-experienced, factory trained experts who also install, commission and troubleshoot on site. We repair and refurbish in our five shops, each holding extensive inventory under humidity controlled conditions and equipped with state-of-the-art test stands, to allow testing under simulated extreme operating conditions before dispatch. Our areas of specialization are:
